

# Goal

## Create a European Information Society for Growth and Employment.

### Priority 1

Build a Single European Information Space which promotes an open and competitive internal market for information society and media.

Review the electronic communications regulatory framework (2006), including defining an efficient spectrum management strategy (2005).

Create a consistent internal market framework for information society and media services by modernising the legal framework and adapting (2007) and rapidly implementing community acquis for such services.

Continue to support the creation and circulation of European content.

Define and implement a strategy for a secure European Information Society (2006)

Identify and promote targeted Actions on interoperability, particularly digital rights management (2006/2007)

### Priority 2

Strengthen Innovation and Investment in ICT research to promote growth and more, and better jobs.

Propose an 80% increase in Community ICT research support by 2010 and invite the member states to do the same (2005).

Prioritise strategic ICT Research around FP7 pillars (2007).

Launch research and deployment initiatives to overcome key bottlenecks requiring both technological and organisational solutions (2006).

Define complementary measures to encourage private investments in ICT research and innovation (2006).

Make specific proposals on an Information Society for All in the Community Strategic Guidelines on Cohesion 2007-2013.

Define e-business policies to remove technological, organisational and legal barriers to ICT adoption with a focus on SMEs.

Develop tools to support new patterns of work that enhance innovation in enterprises and adaptation to new skill needs.

### Priority 3

Create an Inclusive European Information Society that promotes growth and jobs consistent with sustainable development, prioritises better public services and quality of life.

Issue policy guidelines on "e-accessibility" and broadband coverage (2005).

Propose an European Initiative on e-inclusion (2008).

Adopt and e-government action plan and strategic orientations on ICT-enabled public services (2006).

Launch demonstrator projects to test, at an operational scale, technological, legal and organisational solutions to bringing public services on-line (2007).

Set up three 'quality of life' ICT flagship initiatives: ageing society; intelligent car; digital libraries (2007).

the region is the network
